1955 JAGUAR XK140

Registered as 'SON 140' in 1955, this example was supplied new by Midlands Jaguar dealer PJ Evans in right hand drive UK configuration.

Whilst in the custody of the previous owner, 'SON 140' was the subject of a two-year chassis off restoration by a marque specialist costing in excess of one hundred thousand pounds. Contained within the history file are photographic records and invoices documenting the restoration process.

Presented in dark green with matching green mohair hood and tan trim this XK benefits from the desirable Coopercraft brake upgrade and chrome wire wheels. Offered for sale following a recent major service, this pretty XK is ready to be enjoyed as intended – in drop head guise.
