1967 FERRARI 275 GTB/4

The Ferrari 275 GTB/4 was the final development of the 275 series and the first 'production' Ferrari to be fitted with the four cam engine. An immaculate example, chassis 10681 has had its interior re-trimmed by Luppi and extensive work carried out by marque experts GTO Engineering. Complete with Ferrari certification and FIA HTP race papers, 10681 is a hugely impressive Grand Touring Ferrari that is ideal for almost any occasion and event.
