1973 PORSCHE 2.7 RS TOURING

Supplied new to Neuss in Germany and finished in Yellow with black decals with factory options of limited slip differential, Recaro sports seats, electric windows and no sunroof. Purchased by the current owner in 1981, chassis 1165 is a genuine 3 owner car from new and has always remained in Europe. Used by the vendor for many years on high days and holidays, in 2003 he decided to have the car restored by a leading Porsche dealership in Germany. A completely matching number car, 1165 presents and drives exceptionally well and is absolutely correct in its detail.

A substantial history file accompanies the car with invoices dating back to 1974, restoration invoices and photographs showing the work carried out. In addition the original owners handbook with super rare 'RS' supplement comes with the car as well as the original Bilstein jack and spare tyre air bottle inflator (still in its original box!) A recent inspection by a highly respected marque expert confirms this car is outstandingly original and correct, with unimpeachable provenance and a benchmark by which to judge other cars.

A true connoisseurs example with fantastic history.
